

Project Design Phase-II

Customer Journey Map

Date	05 July 2026
Team ID	Solo Project – Individual Capstone
Project Name	Library Management System (ServiceNow)
Maximum Marks	—

Scenario: A student discovers, requests, borrows, and returns a library book through the Library Management System.

Customer Journey Map — Student Borrowing a Book (Library Management System)

Stage	Entice	Enter	Engage	Exit	Extend
Steps	How does a student become aware of the online library service? Told about portal at orientation	What happens as the student begins the request process? Log into Service Portal Browse available books	What happens during the core borrowing process? Request Librarian approves Book status → Issued Email confirmation	What happens as the process finishes? Collect book from library Request status shows issued	What happens after the book is returned? Return book Status → Returned Leave feedback / request again
Goals	Help me discover a faster way to borrow books	Help me find and request a book without queueing	Help me know my request is moving forward	Help me get my book without confusion	Help me return smoothly and come back easily
Positive	Easy to learn about the portal	Search is quick and simple	Fast approval, clear status	No paperwork needed to collect	Simple return process
Negative	Some students unaware it exists	Unsure which books are truly available	Approval depends on librarian availability	Still a manual handover at the counter	No automatic overdue reminder (yet)
Opportunity	Promote portal via student email	Reference Qualifier already filters to Available only	Add SLA/queue for pending approvals	Add self-checkout kiosk integration (future)	Add automated overdue email/SMS (future)
