

Project Design Phase-II

Data Flow Diagram & User Stories

Date	05 July 2026
Team ID	Solo Project – Individual Capstone
Project Name	Library Management System (ServiceNow)
Maximum Marks	4 Marks

Data Flow Diagram:

A Data Flow Diagram (DFD) is a visual representation of the information flows within the Library Management System. It shows how a borrow request enters the system, how it is processed and approved, and how the Book and Borrow Request records are updated as a result.

User Stories:

The table below lists the user stories captured for the Library Management System, grouped by user type and functional requirement (epic).

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Student	Borrow Request Management	USN-1	As a student, I can submit a borrow request for an available book.	Request is created with Status = Requested.	High	Sprint-1
		USN-2	As a student, I can view the status of my own borrow requests.	ACL restricts view to my own records; status shows Requested/Approved/Rejected/Returned.	High	Sprint-1
		USN-3	As a student, I cannot request a book that is already issued.	Reference Qualifier hides books where Status ≠ Available.	High	Sprint-1
	Notifications	USN-4	As a student, I receive an email once my request is approved.	Email received naming the approved book.	Medium	Sprint-2
Librarian	Book Management	USN-5	As a librarian, I can add and update book details (Title, Author, ISBN, Status).	New/updated book appears correctly in the catalog.	High	Sprint-1
	Approval Workflow	USN-6	As a librarian, I can approve or reject a submitted borrow request.	Status updates to Approved or Rejected accordingly.	High	Sprint-1
		USN-7	As a librarian, approving a request automatically	Book.Status changes to Issued via Flow Designer.	High	Sprint-1

			y issues the book.			
	Access Control	USN-8	As a librarian, I have full read/write/delete access to Book and Borrow Request tables.	ACL grants librarian role full CRUD; student role is read/create only.	High	Sprint-2
	Reporting	USN-9	As a librarian, I can view a "Most Borrowed Books" report.	Report groups approved requests by Book and displays top results.	Medium	Sprint-3
System Administrator	Platform Configuration	USN-10	As a system admin, I can configure roles, tables, and ACLs for the application.	Student and Librarian roles, u_book and u_borrow_request tables, and ACLs exist and function as designed.	High	Sprint-1
